GOLDfren®

Disc Brake Pads

2010

Dear Friends, Dear Commercial Partners,

Spacek Product commenced operations in 1991, manufacturing sintered disc brake pads for a wide range of both road and off-road motorcycle model applications, utilising „Goldfren“ as our chosen product brand logo. In the following 19 years since our commencement of manufacturing operations, we have today in 2010 become one of the largest aftermarket suppliers to world markets in this product sector (M/Cycle disc brake pads).

During this period of evolution and growth in our commercial operations; as a result of continuous heavy investment in R & D, we have successfully expanded our product range of sintered brake pads to incorporate aftermarket product to service the Aeronautical, Heavy-Duty Industrial Logistics Equipment (Lifting Cranes), Automotive Motorsport, Mountain Bike, and M/Cycle Motorsport Sidecar, commercial sales sectors.

To continue to endevour to meet our customers evolving demands in the intensely competitive and critical commercial world we all operate in, Spacek Product continues to invest heavily in product R & D to maintain development of „new generation“ products, and to maintain our position at the technological forefront of the Sintered Friction Braking Industry. By basing our manufacturing facility in the Czech Republic which is world renowned for its engineering excellence since some 100 years past, we are able to offer our customers the perfect combination of world leading technology combined with a very competitive production cost base so that the customer and the consumer can purchase the best quality product at the most competitive price – with complete confidence in the performance, durability, and reliability of the product.

We commenced production in 2000 of a complete range of aftermarket Street and Motocross Disc Brake Rotors, applicable to most Japanese and European Sport and Touring M/Cycles, Scooters, ATV M/Cycles, and Motocross models. These Rotors are available in OEM round configuration, and in several other specialised aesthetic style configurations.

One of our current priorities in our manufacturing program is to introduce graphic design elements to differentiate and protect our Goldfren branded product range from plagiarism from inferior product brands attempting to (without our authority) capitalise on our heavy investment in R & D and product promotion. It is our absolute priority to protect and to add value to our Goldfren product reputation, to support and promote our customers marketing programs in their home markets throughout the world.

Dear friends, Dear commercial partners; we thank you for your current and past support , and we are sure that you continue to value our efforts to offer you the best possible product technology and pricing that your market demands, and we are confident that you will value our Goldfren product range as a „priority and preferred“ product group in your inventory and marketing strategies.

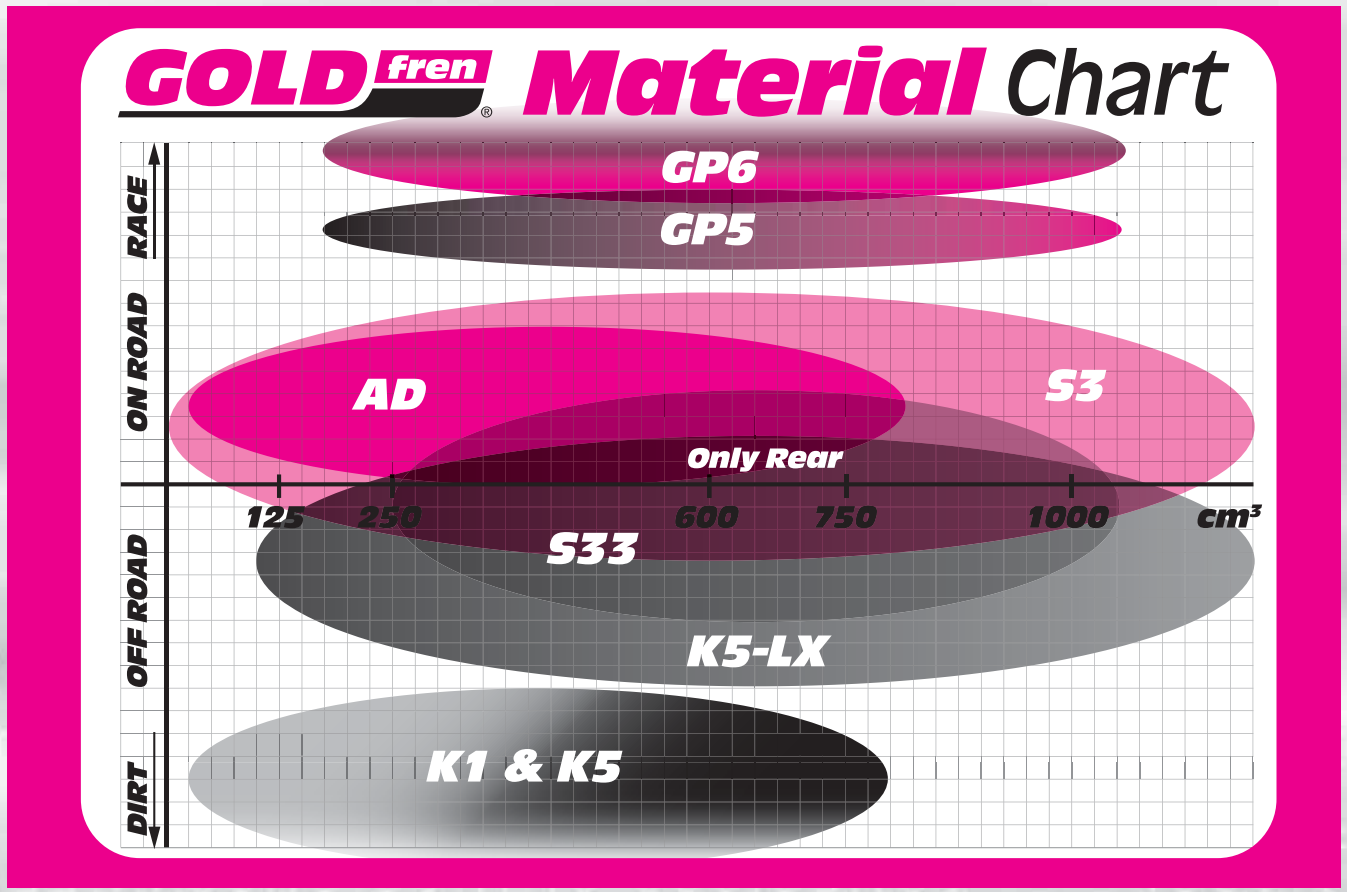

Yours Truly, Mr. Stanislav (Stan) Spacek

Managing Director / Spacek Product

Brake pads are now original equipment on most, new models replace sintered Asbestos and Lead Free

Performance brake pads

High Quality
High Ecologic Works

Installation Instructions

- Verify the correct selection of the brake pads at the dealer's in accordance with the bike type and manufacturing year of your bike.
- Replace the brake pads as soon as the braking surface thickness has dropped below 2 mm.
- Protect the brake pad surfaces against grease, oil and other chemical substances.
- Clean and degrease the brake wheels prior to installation of new brake pads.
- Replace damaged brake wheels reducing the braking effect and, at the same time, shortening the lifetime of the brake pads.
- Install the brake pads directing their braking surfaces towards the brake wheel. Having completed the installation, check correct mounting and securing of the pads.
- Entrust a specialized servicing shop with the installation of brake pads when lacking experience.
- Tested by the German Testing Institute TÜV.

Running-In New Brake Pads

The correct way of running-in newly installed brake pads is the prerequisite for their long lifetime and for a reliable braking effect of the bike brakes. If possible, do not provide your motorbike with new brake wheels during running-in new brake pads.

Cleaning of the brake wheels using abrasive paper is recommended in case of their previous use with another lining material. After the installation of the brake pads, their fitting must be free and without excessive clamping in the brake mount.

Having revved up your bike, brake several times at lower speeds to achieve a contact surface of 80 to 90 per cent of the total area of the active brake pad surface between the brake wheel and the pads. Then brake the bike several times at higher speeds and allow the brake pad lining to get cooled while driving. After this running-in procedure, the brake pads may be normally used.

Metal - Ceramic - Brake pads	product material **S33**
Metal - Ceramic - Brake pads	product material **GP6**

During this period of evolution and growth in our commercial operations as a result of continuous heavy investment in R & D, we have successfully expanded our product range of **sintered brake pads** to incorporate aftermarket product to service the Aeronautical, Heavy-Duty Industrial Logistics Equipment (Lifting Cranes), Automotive Motorsport, Mountain Bike, and M/Cycle Motorsport Sidecar, commercial sales sectors.

Sinter, metal-ceramic friction **materials** are manufactured with the help of a modern method of powder metallurgy under the **Goldfren** mark. Proved manufacturing technology and essential quality control system ensure reaching required material properties, namely high thermal and mechanical endurance and high friction coefficient. These **sinter, metal-ceramic** friction materials are applied in various industrial branches, for example, car industry, engineering equipment, construction machines, aviation industry and sport purposes.

Sinter materials are characterised by high and permanent friction coefficient at temperatures up to 800 ° C, and thermal stability with minimum abrasion. Materials do not contain asbestos, glass fibre or formaldehydes, and are environmentally friendly. They can be used in dry oil bath. In comparison with organic friction materials, their service life is several times longer.

GOLDfren®

- **Brake discs are manufactured of high-quality steel**
- **They are a unique replacement of original**
- **Round or flor**
- **New types of OFF-ROAD brake discs with flors are available for all OFF-ROAD, ATV types, scooter and road front and rear discs and SUPERMOTARDS**

OFF-ROAD brake discs

- New lightened design
- Round or toothed in three designs
- These discs are available in the standard size for all models of MX motorbikes

OVERSIZE front brake discs

- These are discs of extra sizes
- These discs are delivered with special adapters intended for such purpose
- These discs can be mounted very quickly and easily thanks to excellent adapters
- New super light floating rotors with centers from racing– dural material

OVERSIZE rear brake discs

- These are discs of extra sizes
- These discs are delivered with special adapters intended for such purpose
- These discs can be mounted very quickly and easily thanks to excellent adapters we have prepared colored eloxal coated rear disc protectors

ATV brake discs

- ATV is a field that requires high-quality materials of a unique design in the field of brake discs thanks to a rapid growth

SUPERMOTO brake discs

- These are discs with the diameter of 320 mm modified from the front discs into the discs with adapter
- Special racing design in more colors like gold, black and etc.

Road rear brake discs

- They are manufactured of high-quality steel that prevents in cracking
- Gold or silver zinc that prevents in corrosion is also used as a protection
- For racing use are discs produce in black colour
- Discs are manufactured with a unique GOLDFREN design

Road front brake discs

- They are manufactured of high-quality steel that guarantees high braking adaptability
- Lightened aluminium racing centers, this is possible to suply in different colours
- Is it possible to suply this in twoo

Brake Disc

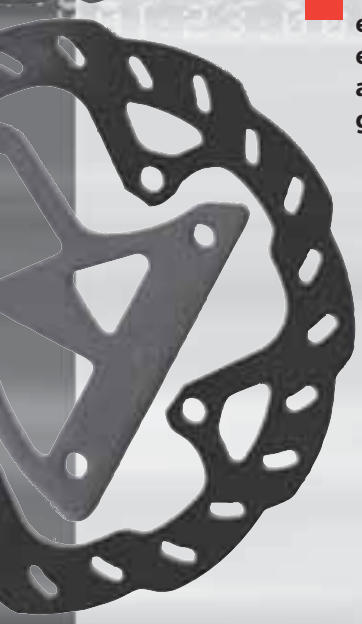

GOLDfren®

Goldfren brake disks tradition has been lasting several years. We produce discs for all motorcycle and scooter makes. All discs are manufactured from several types of steel. Materials determination depends on the customer's (competitor's) demands and his driving style (brakes application). For optimum discs performance, an appropriate composition of brake pads blend shall have to be correctly selected. We are manufacturing several kinds of blend now, and continuously develop more effective composition considering the disk material. In this issue, our company utilises rich and very important experience of worldwide competitors, who test all our novelties.

The most rampant group consists of off-road discs. These discs are manufactured in several designs (round, flor, dentate, relieved dentate) and in several colour versions (black, silver, gold). Owing to the material quality improvement, the discs can be more relieved and comply this way with the requirements of prominent competitors. Such enhanced discs are offered also to current customers. Off-road floating discs became a great hit last year that are also involved in our offer. Floating discs consist of two parts: disc centre and crown (braking part). We succeeded in designing a very interesting and practical style of the disc centre. Crowns are also manufactured from a high-quality steel, consequently, these discs meet high quality demands. In addition to these discs of current dimensions, we produce oversize (enhanced) offroad discs of similar quality; to enable their application, it shall be necessary to purchase our adapter.

Another chapter are scooter discs considering ever increasing number of scooters on our roads. Our company can operatively manufacture a disc for all scooter makes offered on our market. Due to permanent enhancement, we reached a very nice and demanded design called flower. Surface finished, crystal silver galvanizing gives the scooter really eye-taking appearance.

Supermoto is another range of the motor sport that is less spread here. These discs are manufactured both like integrated (rigid), and floating discs. Rigid discs are made from a high-quality steel, their appearance is conformable to the offroad discs of greater dimensions: their diameter equals 320 mm. Application of these discs is conditional on the adapter (it ensures the brake valve movement to the appropriate brake position on the disc). The adapter manufacture is a very demanding operational process running on up-to-date CNC machines. They are manufactured from high-quality and lightest alloys achieving necessary hardness and strength. Centres of floating discs are also manufactured from similar materials; accordingly, although of greater dimensions, they are not so heavily loaded. These centres may be manufactured – besides current silver, gold and black colour – in any required colour tone according to the customer's demand to be consistent with the colour of his motorcycle.

On-road floating discs belong among the most demanding products. Their manufacture and design is similar to Supermoto, however, the exception consists in discs with sunken (disciform) centre. It is necessary to utilise CNC machines for these centres fabrication, ensuring high accuracy and quality. The material must be also characterised with high quality, lightness and strength. Centres colour design can be accomplished in all basic colours. Since these discs are applied in very powerful and fast machines, the crowns are also made from the high-quality steel. Through successive development we arrived at a conclusion that it is not necessary to integrate a cooling groove at the crown perimeter, because used material in itself is very resistant and effective in removal of heat. All our discs ensure correct braking impact and safe operating both at wandering, and at demanding racing.

GOLD fren®

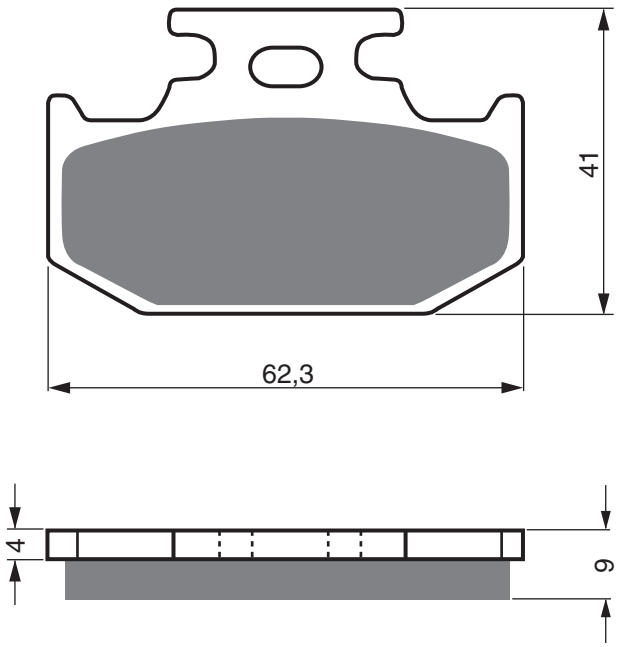

Brake Caliper

- Dural **GOLD fren** brake caliper is made in highest quality by CNC technology
- Low weight and elegant brake caliper ensures high strenght and durability
- Shape of the caliper is optimized for maximum load pressure and for stability in extreme conditions
- Rear one-piston brake caliper ensures equal abrasive wear of brake lining
- Brake pistons are made of stainless steel and minimizes heat transfer onto caliper and brake liquid
- This caliper is compatibile with original brake lining and **GOLD fren** lining in any compound
- This caliper installation does not require adapter
- Fits to the most of European and Japanese off road bikes Kawasaki, Suzuki, Yamaha
- Surface is eloxaly coated and can be adjusted depending on customer's requirement
